ILLINOIS

and

CHICAGO AND ITS ENVIRONS

These book lists of approximately 350 titles were compiled as the bibliography for the Illinois Section of The American Guide, and were selected from the working bibliography used in connection with compiling that work. The various classifications have been arranged to conform to the table of contents of the Illinois State Guide. Each entry is keyed to indicate whether the book is illustrated (I), and whether it contains a bibliography (B), meager or extended. Publisher and publication date are specified, and in most cases a brief descriptive sketch of the book is given.

The books included are not of equal merit nor are the categories complete. The compilation has essentially been a process of exclusion, but an effort has been made

I l l i n o i s B i b l i o g r a p h y

not to omit from the various classifications any outstanding works written from the point of view of our city or our State. Some excellent books on geology, archeology, and folklore were not included because they treat these subjects without emphasis on Chicago or Illinois. Therefore the inclusion of Government, University, and State Department bulletins and of monographs published in the journals of the various historical societies has materially strengthened these more limited divisions.

Some of the most valuable books are not the work of single authors, but are the result of the collective effort of a staff of experts in their respective fields. Historical works of this nature usually have the benefit of seasoned judgment obtainable only in viewing events at a distance. On the other hand, some older histories have been included which are not of the first magnitude, and though somewhat opinionated and lacking in perspective, throw the very valuable sidelight of contemporary thought on the events narrated.

. Grateful acknowledgment is made to a number of reference librarians for cooperation and suggestions.
